

Lagebeziehung zwischen Gerade und Ebene

Wissensspeicher

Wir untersuchen die Lage einer Geraden $g : \vec{x} = \vec{q} + r \cdot \vec{u}$ und einer Ebene $E : [\vec{x} - \vec{p}] \cdot \vec{n} = 0$.

Lagebeziehung	Bedingung	Beispiel
	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
